Dear Tony Morrissey,

Following the recent recertification audit of your Company's Management System, I am pleased to inform you that the Alcumus ISOQAR Certification Technical Review Team has asked me to confirm that your certificate is now valid until 14 February 2026 subject to effective maintenance of your management system. Your system will be monitored on a regular basis by Alcumus ISOQAR and your system will be subject to a further recertification audit prior to the period end. It is important to stress that any non-conformances found on this or future audits will be the result of limited sampling by Alcumus ISOQAR auditors and therefore it cannot be assumed that others do not exist.

***Please ensure that you destroy your previous certificate.***

One surveillance visit (of three days per visit) has been set for your company in the first year of continued registration.

Should you wish to display registration logos on your letterhead, promotional materials, or website etc, they can be downloaded from [www.alcumusgroup.com/login](http://www.alcumusgroup.com/login) You will also find current rules for logo use and we strongly recommend that you refer to these prior to instructing your printers. Please note that for logo purposes your Certificate Number **11994**.

We hope you are happy with the quality of our service. Alcumus ISOQAR prides itself on maintaining high customer satisfaction levels, to this end we have put in place electronic customer survey forms which are sent upon completion of each client audit visit, if you have not received the link to complete our survey yet, please let us know and we will send you another.

Yours sincerely,

Samuel Kitson  
General Manager - ISOQAR
